Q.10. 4 Marks

Possible Answer	Marks
The coin will drop into glass	2
The coin will drop into glass due to inertia. Heavier the weight the higher will be inertia and more force is required to change it from the original position. Since the coin is heavier than the thick card, so flicking the card will move the piece of card due to less inertia (light weight). The coin will drop into glass due to inertia (heavy weight)	2
